

Service Provider Info

*RGM Synovations, Inc guide to the
DMN CONNECT MBB-34G*

RGM Synovations, Inc.

09/2020

Thank you for your purchase of a **DMN Connect** by RGM Synovations.

If you haven't already you need to establish a data plan with a service provider. Our recommendation is to use **Verizon** as primary and **ATT** or **T-Mobil** secondary. The DMN Connect will go to the strongest cellular signal upon booting and switch if that changes.

If you have a IT department that handles your cellular plans they should be able to routinely handle it.

What the carrier needs to establish the data service is the devices **IMEI number** which will be provided when the unit is ordered.

Once the data service is established the SIM cards need to be sent to RGM Synovations for installation and setup.

When ordering the SIM card please request the **Large Triple Cut**.

If you have any question please do not hesitate to contact us.

For questions about Verizon products or their plans contact Richard Dumais at richard.dumais@verizonwireless.com.
